3M™ Nomad™ Ultra Clean Matting 4300

**Strong adhesion.
Clean rooms.**

3M™ Nomad™ Ultra Clean Matting 4300

Stop fine dirt at your clean room entrance
thanks to this mat made of multiple adhesive-coated layers.

Excellent removal and retention of dirt particles

The sticky surface of the transparent polyethylene layers removes dirt and dust particles from shoe soles and tyres.

Non-slip and easy to replace

The mat's vinyl backing adheres very well to the floor without any adhesive transfer when the mat is replaced.

Trip-free zones and easy to negotiate

The mat's flat construction makes it easy for feet and wheels to cross.

Comply with quality assurance systems

If the top layer of the mat gets dirty or loses its stickiness, the layer can simply be peeled off from the corner of the mat. All layers are numbered in descending order. This makes the number of remaining layers clearly visible.

3M Nomad Ultra Clean Matting 4300 can assist you in obtaining
ISO14644-1 certification Class 4 to 8 for clean rooms.
